# Foreword

It is with deep concern that we present the Bangladesh Workplace Death Report, 2022, which marks the 12<sup>th</sup> publication in a series aimed at bringing to light the grim reality of workplace accidents and deaths in Bangladesh. Despite the basic human right to a safe workplace, workers in Bangladesh continue to suffer from unsafe working conditions, leading to a rising number of deaths and injuries. In the past years, we have witnessed a significant number of workplace deaths, with many of them being preventable. These incidents have not only resulted in the loss of lives but have also caused immeasurable grief and trauma to the affected families and coworkers.

The year 2022 was the shock recovering year of the COVID-19 pandemic. All the factories and establishments started their interventions/journey again with full swing where care about health and safety of workers were less important than growth or development. Thus, the number of deaths reported due to workplace accidents has increased, signaling a serious issue that requires immediate attention.

As per the Bangladesh Labour Act- 2006 and subsequent rules- 2015, it is mandatory for establishment authorities to keep records of all accidents, minor or major. However, such records are rarely found. Therefore, this report, based on monitoring 15 national and 11 regional newspapers by SRS, is intended to provide an authentic picture of workplace accidents and deaths to stakeholders and actors. We hope that this report will serve as a valuable source of information for future researchers, policy makers, and activists working to reduce workplace accidents and fatalities.

Workplace safety is a shared responsibility, and every employer and employee has a role to play in creating a safe and healthy work environment. It's essential to prioritize safety measures and implement appropriate safety protocols to reduce the risk of workplace accidents.

We are grateful to Diakonia, a Sweden-based development organization, for their continuous support since 2012 in promoting workplace safety and protecting workers' rights in Bangladesh. Without their support, it would not have been possible for SRS to publish this series of reports for years.

We sincerely hope that regulatory authorities and agencies responsible for enforcing the Act, Rules, and Policies on labor, as well as media and other organizations working to improve workplace health and safety conditions in Bangladesh, will find this report useful. We acknowledge that many accidents are still beyond our reach and plan to extend our monitoring system to online-based news and views to cover more. We welcome any comments or suggestions for further improvement of this report and extend our heartfelt thanks to all who have supported our efforts in ensuring workplace safety in Bangladesh.

Dhaka  
March 2023

Sekender Ali Mina  
Executive Director

# About Safety and Rights Society

Safety and Rights Society (SRS) is a local non-profit organization, registered under both the Societies Registration Act 1860 and Foreign Donation (Voluntary Activities) Regulation Ordinance 1978. It started its' journey in 2009. The main concern of the organization is to improving workplace conditions and promoting consumer and public safety in Bangladesh. The organization aims to ensure that the overall conditions faced by people at work are decent and are at the very least in compliance with the law.

## Workplace Safety, Compensation and Accountability

The larger goal of SRS is to advance labor rights in Bangladesh, and one of its primary programmatic focuses is Workplace Safety Compensation and Accountability (WSCA). As of 2012, Diakonia, SRS's development partner, has been funding this program.

The WSCA seeks to enhance the working environment's health and safety conditions and to ensure that dependent families and wounded workers receive just compensation in accordance with the law when they are affected by workplace accidents. Its emphasis is primarily on individuals working in the industrial and service sectors of the nation.

It works to improve conditions by:

- undertaking research to obtain a better understanding of the occupational health and safety situation in Bangladesh, including the numbers and circumstances of deaths and injuries and the necessary changes in workplace practices;
- promoting the reform of health and safety legislation in Bangladesh so that it offers appropriate protection to workers;
- providing training on workplace health and safety and other labour rights issues to the construction, garment, leather-tannery and stone crushing workers and mid-level management;
- assessing the activities of the Department of Inspection for Factories and Establishments and other regulatory bodies with the aim of seeking improvements in how they seek compliance with, and enforcement of the law;
- providing information and guidance to employers so that they understand their health and safety obligations and the steps they need to take to fulfill them;
- offering health and safety management training to employers;
- assisting trade unions in raising health and safety concerns with employers and enforcement bodies;
- filing strategic public interest litigation in the High Court of Bangladesh with the aim of ensuring that state bodies comply with their constitutional and legal requirements to provide workers with safe and healthy conditions at work;
- working to ensure the effectiveness of National Industrial Health and Safety Council and the implementation of National Occupational Health and Safety Policy;
- working to ensure gender equality and to reduce violence and harassment in the world of work;
- working to ensure the effectiveness of labour welfare fund.

It assists dependent families and injured workers gain compensation by:

- monitoring national and regional newspapers for reports of workplace deaths;
- investigating the circumstances of workplace deaths & injuries and contacting dependents & injured workers to determine whether they need assistance for realizing compensation;
- obtaining information about workplace injuries through research at hospitals;
- informing employers of their obligation to pay compensation in relation to specific deaths and injuries and filing cases in the Labour Court where necessary (together with BLAST)

It works for protecting the rights of GIG workers through establishing Young Workers Forum (YWF) by:

- organizing gig workers under a common platform called Young Workers Forum (YWF);
- conducting awareness campaigns to highlight the absence of occupational health and safety measures for gig workers and to inform them of their rights and entitlements;
- networking with organizations that serve youths;
- equipping young people with resources and training to foster entrepreneurship qualities;
- connecting young girls and boys with various opportunities that they can utilize in their profession;
- advocating for menstrual hygiene, personal hygiene, and healthy food habits among young working women.

# Workplace Death Analysis of 2022

## 1. Background

A workplace accident is an unexpected event that occurs in a work environment, resulting in the injury or death of an employee. Workplace accidents occur in any industry, including construction, manufacturing, services, agriculture and transportation.

There are several causes of workplace accidents, which can include road accident; explosion; electrocuted; lightning; falls from the floor or above; hit by hard or heavy objects; drowned in water; burned by fire; being exposed to poisonous gas and collapse of hills, soil, bridges, buildings or roofs, walls.

One of the regular tasks that SRS has been truly carrying out since its beginning is keeping a record of workplace accidents that result in death and injury and publishing the report. In order for the public to understand the actual working conditions and advocate for a safe and decent workplace, one of the goals of this study is to gather the data in one location and make it available to them.

## 2. Methodology

This study examines workplace fatalities that occurred in Bangladesh in 2022 in the manufacturing, construction, service, agriculture, and transport sectors. It also analyzes the events by industry, cause, age and gender of the deceased, and location of the incident.

By keeping an eye on 11 regional newspapers<sup>1</sup> from Barisal, Chattogram, Khulna, Rajshahi, and Sylhet as well as 15 national newspapers<sup>2</sup>, information concerning the deaths was discovered.

### 2.1 Kinds of deaths monitored

This report focuses on the deaths of workers at the workplace, arising out of issues relating to occupational safety and health and concerned with the management of the work, including details of transport workers (drivers or conductors and helpers working in vehicles) who have died in the course of their work. However, the report does not include deaths of workers travelling to or from work by using public vehicles as these deaths primarily raise issues of road traffic safety rather than occupational health and safety. But any work related travel by using an official vehicle is included.

The report also does not include deaths of workers as a result of police, or other kinds of violence or in incidents outside of the workplace – as none of these relate to occupational health and safety issues.

---

<sup>1</sup> Regional: Daily Azadi, Purbakon, Purbodesh, Sonali Sangbad, Sonar Desh, Sunshine, Purbaanchal, Janmobhumi, ShamoyerKhabor, SylheterDak, Shabuj Sylhet, Shahanama, Dhakshinanchal, Daily Paribartan.

<sup>2</sup> National: The daily Star, The Independent, New Age, The Daily Sun, Ittefaq, ProthomAlo, KalerKantha, Samokal, Sangbad, Janakantha, Jugantor, Nayadiganta, Inquilab, Jai Jai Din, BanikBarta

This report focuses on industrial and service sector deaths – but it does include details of certain agricultural deaths (where the newspaper reports clearly indicate a workplace safety issue). Very few agricultural sector deaths are reported in the newspapers and those are reported mainly died from lightning stroke.

Deaths at sea is another phenomenon where in most of the cases the newspaper publishes only the list of missing fisher folks – which makes it very difficult to know whether the incidents have anything to do with the management of health and safety issues. In addition, further press reports often fail to indicate the final conditions of the workers.

## 2.2 Accuracy of the Information

The accuracy of information regarding workplace deaths can vary depending on a variety of factors, such as the source of the information, the type of incident, and the thoroughness of the investigation. The prime source of this information is from monitoring deaths that are reported in national and some regional newspapers. Relying on this data creates two problems. The first problem is that newspaper reports almost certainly do not reflect, by a high margin, the actual number of workplace deaths that have taken place.

The second problem concerns the accuracy of the newspaper reports themselves. Interestingly, that in the great majority of the cases, the key information contained in the papers was accurate. Though, it was usual for there to be some small errors in the spelling of the names of the deceased, the incident address and the circumstances of the death. It is rarely found that those deaths were not work-related or the location of the death could not be identified.

## 3. Analysis of workplace deaths in 2022

An analysis of workplace deaths is given by the following issues-

- The number of deaths and the number of separate incidents that resulted in the deaths;
- The district where the death took place;
- The sector in which the death took place;
- The sub-sector in which the death took place;
- The month of the year when the death took place;
- Age distribution of the workers who died;
- The gender dimension; and
- The causes of deaths.

### 3.1 Workplace deaths by year

The given bar chart shows the number of reported workplace deaths over a period of years. The highest number of deaths reported was around 712 in 2022 except the exceptional case occurred in 2013 where 1134 workers died due to Rana Plaza building collapse. However, it should be noted that these figures are likely to be a significant underestimation of the actual numbers. This is because many workplace deaths go unreported in newspapers.

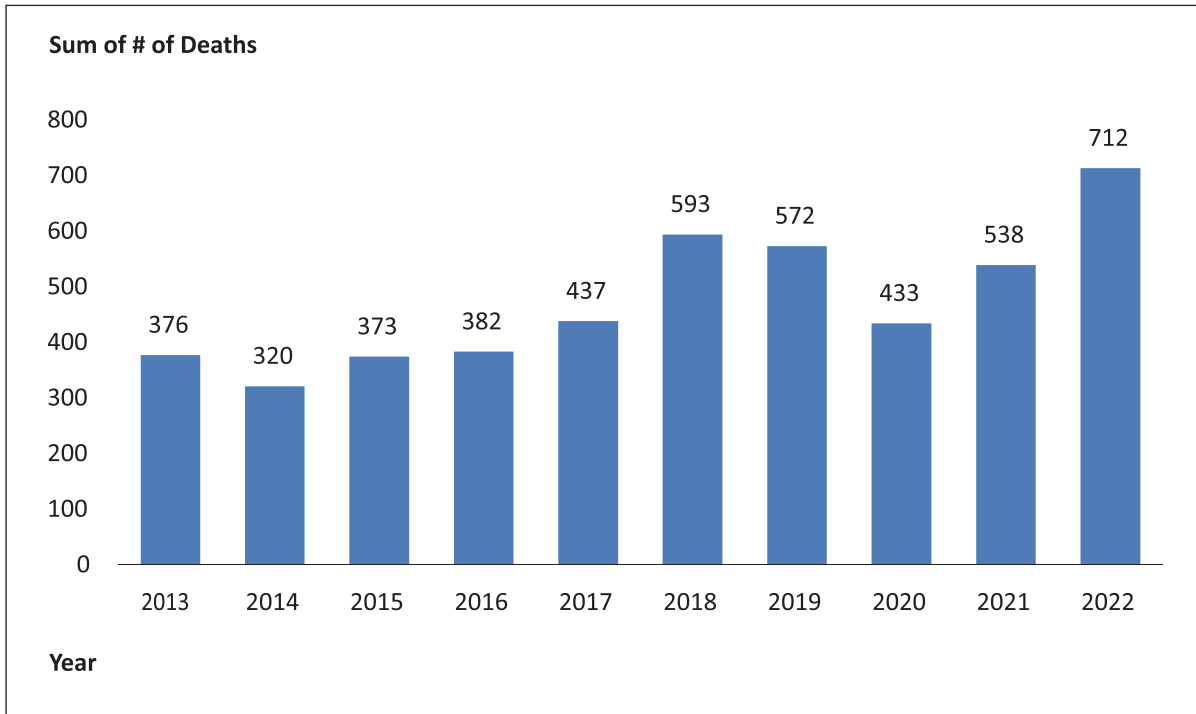

Figure 1: Total number of deaths by year (2013-2022)<sup>3</sup>

### 3.2 Workplace deaths in different Districts

The given table provides information on workplace deaths in different districts in the year 2022. According to the table, there were a total of 544 incidents resulting in 712 deaths across the country. The highest number of deaths occurred in Chattogram, with 97 deaths (13.62%) resulting from 39 incidents. Dhaka was the second-highest with 84 deaths (11.80%) resulting from 69 incidents, followed by Narayanganj with 32 deaths (4.49%) resulting from 26 incidents.

It is important to note that all the districts (64 districts) had at least one accident resulting in one or more deaths of workers, highlighting the widespread nature of workplace accidents in the country. This underscores the need for better workplace safety measures and improved enforcement of existing regulations to prevent such incidents from happening in the future.

Overall, the table provides a useful summary of the number of incidents and deaths that occurred in different districts in 2022. It highlights the need for greater attention and investment in workplace safety across the country to reduce the number of workplace accidents and fatalities.

<sup>3</sup> In 2013, 376 workers died (excluding the 1134 confirmed Rana Plaza deaths).

Table 1: District-wise workplace accidents and deaths

SL	Name of the Districts	# number of Incident	# of Deaths	%
1	Bagerhat	7	8	1.12
2	Bandarban	1	1	0.14

<b>Total</b>		<b>544</b>	<b>712</b>	<b>100</b>

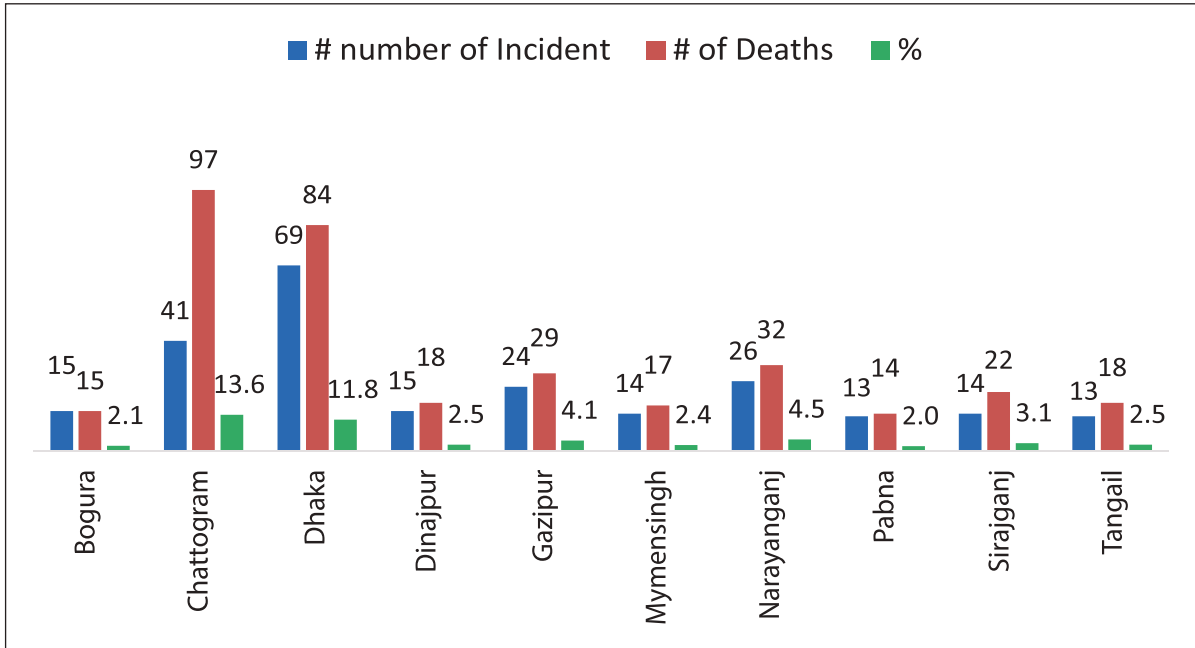

Figure 2: Deaths in different industrial areas of Bangladesh

The given horizontal bar chart depicts the number of industrial accidents that occurred in different regions, with a focus on the regions that experienced the highest number of accidents resulting in deaths. According to the chart, Chattogram, Dhaka, Narayanganj, Gazipur, Sirajganj, Tangail, Dinajpur, Mymensingh, Bogura, and Pabna were the region most prone to industrial accidents, accounting for more than 48.60% of total deaths.

The chart shows that Chattogram had the highest number of industrial accidents, followed by Dhaka and Narayanganj. Gazipur, Sirajganj, Tangail, Dinajpur, Mymensingh, Bogura, and Pabna also had a significant number of industrial accidents.

### 3.3 Deaths in different working sectors

The following bar chart displays the distribution of workplace deaths across different sectors in Bangladesh. The chart highlights that the transport sector had the highest number of deaths with 333 fatalities, accounting for 46.77% of the total deaths. The service sector had the second-highest number of fatalities with 170 deaths (23.88%), followed by the construction sector with 104 deaths (14.61%), agriculture sector with 62 deaths (8.71%), and the manufacturing sector with 43 deaths (6.04%).

The bar chart provides a clear visual representation of the extent of workplace fatalities in different sectors, with the transport sector emerging as the most dangerous. This information could be used to target interventions and improvements to reduce the number of workplace deaths in the transport sector, as well as in other sectors with high fatality rates.

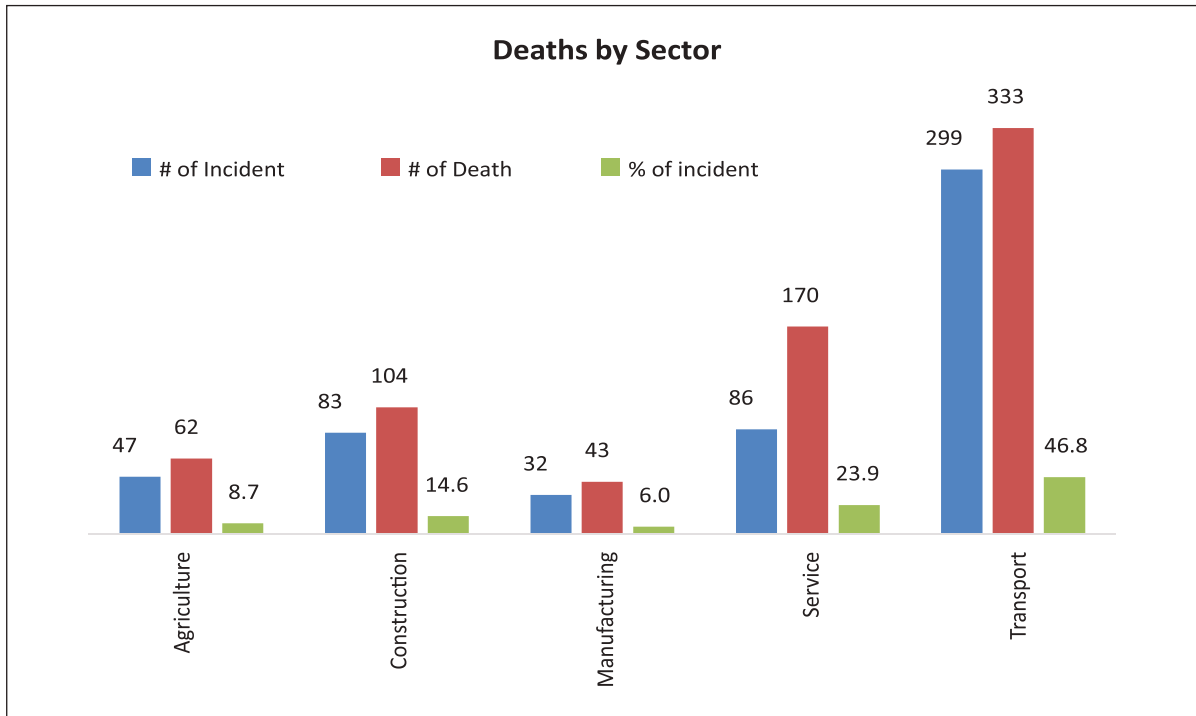

Figure 3: Deaths in different working sectors

### 3.3.1 Deaths in manufacturing sector

The provided table offers information on the distribution of workplace deaths within the manufacturing sector in Bangladesh, highlighting the industries with the highest number of fatalities. The table indicates that Brick fields, Chemical Factories, Garments, Rice Mills, Shoe Factories, Steel Mills, and Ship Breaking/Building were also associated with significant numbers of deaths. This information could be used to identify the most dangerous industries within the manufacturing sector and to target interventions and improvements to reduce the number of workplace deaths in these sectors.

Table 2: Deaths in different working field in Manufacturing Sector

SL	Manufacturing Sub-sectors	# of Incident	# of Deaths
1	Aluminium Factory	1	1
2	Brick field	3	3
3	Chemical Factory	1	4
4	Electric Sector	1	1
5	Fire Work Factory	1	2
6	Food and Beverage	1	1
7	Furniture Factory	2	3
8	Garments/RMG	3	4
9	Glass Factory	1	1
10	Ispat Factory	1	1
11	Metal	1	1

SL	Manufacturing Sub-sectors	# of Incident	# of Deaths
12	Paper Mill	1	1
13	Plastic factory	1	1
14	Rice Mill	4	6
15	Rubber Factory	1	1
16	Ship breaking/building	1	1
17	Shoe Factory	1	3
18	Steel Mill	4	5
19	Tannery	1	1
20	Unknown	2	2
<b>Total</b>		<b>32</b>	<b>43</b>

### 3.3.2 Deaths in Construction sector

The provided table displays information on workplace fatalities in the construction sector in Bangladesh, with a particular focus on the number of deaths associated with different types of construction projects. According to the table, Building Construction was associated with the highest number of deaths, with 89 fatalities. Road and Power Plant construction had a relatively lower number of fatalities, with 1 death for each.

Table 3: Deaths in different working Sub-sector of Construction

SL	Construction Sub-sectors	# of Incident	# of Deaths
1	Bridge/Flyover	6	6
2	Building	70	89
3	Power Plant	1	1
4	Road	1	1
5	Unknown	5	7
<b>Total</b>		<b>83</b>	<b>104</b>

### 3.3.3 Deaths in Transport

The given table describes the vulnerability of the transport sector in Bangladesh, with a focus on the types of vehicles that have been associated with the highest number of fatalities. According to the table, a significant number of deaths (141) occurred in accidents involving Dumper Trucks, Jeeps, Lorries, Trucks, and Covered vehicles.

In addition to these vehicles, the table indicates that 120 deaths occurred in accidents involving Alom Sadhu, Auto Rickshaws, Easy Bikes, Nasimons, Vans, Human Haulers, and Rickshaws. Finally, the text notes that 59 deaths occurred in accidents involving buses, minibuses, CNGs, and private cars. It is to be noted that these numbers include only the workers means drivers, conductors, and helpers.

Table 4: Deaths in different working Sub-sector of Transport

SL	Manufacturing Sub-sectors	Alom Sadhu/Auto Rickshaw/Easy Bike/Nasimon/ Van/Human Hauler/Rickshaw	Boat/ Ship	Bus/ Micro Bus/ CNG/ Private Car	Dumper Truck/Jeep/ Lorry/Truck/ Covered Van	Motor-cycle	Unknown	Total
1	# of Incident	116	1	53	119	1	9	299
2	# of Deaths	120	1	59	141	1	11	333

### 3.3.4 Deaths in Service

The provided table presents information on workplace fatalities in the service sector in Bangladesh, with a particular focus on the number of deaths associated with different types of service providers. According to the table, a significant number of deaths occurred among day laborers and depot workers, with 111 (including 50 killed in Sitakunda accident) fatalities resulting from 45 incidents.

In addition to day laborers, the table also highlights the risk of fatal accidents for electricians or those involved in electric supply or Polly Biddyut works, with 13 deaths. While this group had a lower number of fatalities compared to day laborers, the data suggest that this type of work may be particularly hazardous and may require additional safety measures to reduce the risk of accidents.

Overall, the table provides a clear and concise overview of workplace fatalities in the service sector in Bangladesh, highlighting the importance of targeted interventions to reduce the number of deaths among day laborers and other service providers. The data could be used to inform the development of safety programs and policies aimed at reducing workplace fatalities and improving safety outcomes in the service sector.

Table 5: Deaths in different working Sub-sector of Service

SL	Service Sub-sectors	Mechanic/ AC Mechanic/ Cable Network/ Workshop	Day Labourer/ Depot	Domestic Worker/ Night Gourd/ Security Gourd	Electric shop/Electric Supply/ Polli Biddyut/ Electrician/ Power House	Boat/ Launce/ Oil Tanker/ Ship	Rest-aurant/ Shop	Fish-erman/ Fishing	Un-known	Total
1	# of Incident	5	45	6	12	3	4	5	6	86
2	# of Deaths	7	111	6	13	5	4	13	11	170

### 3.3.5 Deaths in Agriculture

The provided table presents data on workplace fatalities in the agricultural sector in Bangladesh. The data suggest that the most significant number of deaths occurred in paddy fields, with 52 fatalities resulting from 38 incidents.

In addition to paddy fields, the table also highlights the risk of fatal accidents in fishing sub-sectors within the agricultural industry, with 7 deaths resulting from 6 incidents. While this information is limited, it suggests that there may be additional hazards in the agricultural sector that require further investigation to reduce the risk of workplace fatalities.

Table 6: Deaths in different working Sub-sector of Agriculture

SL	Service Sub-sectors	Fishing	Live Stock	Paddy Field	Tea Garden	Total
1	# of Incident	6	2	38	1	47
2	# of Deaths	7	2	52	1	62

### 3.4 Causes of death in Working Sectors

The chart shows that in 2022, the highest number of deaths occurred in road crashes (353), followed by explosion that includes boiler, gas cylinder, AC, etc. (84), electrocution (69), lightning (57), fall from height (45), crushed by object (38), drown in water (24), burnt in fire (14) and Suffocation (14). In Agriculture lightning strikes were the main cause of deaths, in construction it was fall from height, in service it was explosion, in manufacturing it was also explosion and in transport it was road crashes.

Table 7: Causes of death in different Working Sectors

SL	Sectors	Burn in fire/hot water	Lightning	Electrocution	Crushed by Object	Fall from height	Poisonous gas/Suffocation	Wall/Mud/Stair/Roof/Earth collapse	Drown in water	Cylinder/Boiler Explosion	Road Accident	Illness	Total
1	Agriculture	0	44	7	1	0	0	0	2	0	8	0	62
2	Construction	0	1	23	9	37	13	10	0	3	8	0	104
3	Manufacture	7	0	5	10	3	0	0	0	16	1	1	43
4	Service	7	12	30	18	5	1	3	21	62	11	0	170
5	Transport	0	0	4	0	0	0	0	1	3	325	0	333
	Total	14	57	69	38	45	14	13	24	84	353	1	712

## Deaths in workplaces caused by Fire

The given table shows that the fire incidents in the workplace are very common. Bangladesh had observed some terrible fire incidents in the previous few years. In the last ten years (2013 to 2022), 453 workers died at workplaces by fire. Most of the deaths occurred in the manufacturing sector (383 out of 453). Highest numbers of workers died in 2013 where 92 workers died. 72 workers died in 2021. Then 65 workers died in the year of 2019, 64 workers in 2016, 52 workers in 2014, Some 47 workers died in 2015, 18 workers died in 2020 and 2020, 14 workers died in 2022 and 11 workers died in 2018.

Table 7.1: Deaths in workplaces caused by Fire in last ten years from 2013 to 2022

Working Sector	Years										
	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Total
Construction	-	-	7	-	1	-	-	-	-	0	8
Manufacture	90	46	33	63	16	7	39	12	70	7	383
Service	2	6	7	1	1	4	26	6	1	7	61
Transport	-	-	-	-	-	-	-	-	1	-	1
Total	92	52	47	64	18	11	65	18	72	14	453

## 3.5 Deaths by Age

Data shows that a significant number of the deceased workers' age could not be identified, accounting for 195 (27.39%) of the total deaths. Among the identified age groups, the highest number of deaths occurred in the 21 to 30 years age group, which accounted for 179 (25.14%) of the total deaths. The 31 to 40 years age group was the second highest, with 136 (19.10%) of the total deaths, 41 to 50 years age was the third highest, with 90 (12.64%) of the total deaths. 60 (8.43%) of the deceased workers were 20 years old or younger, 5.62% (40) were 51 to 60 age and 1.69% (12) were older above the 60.

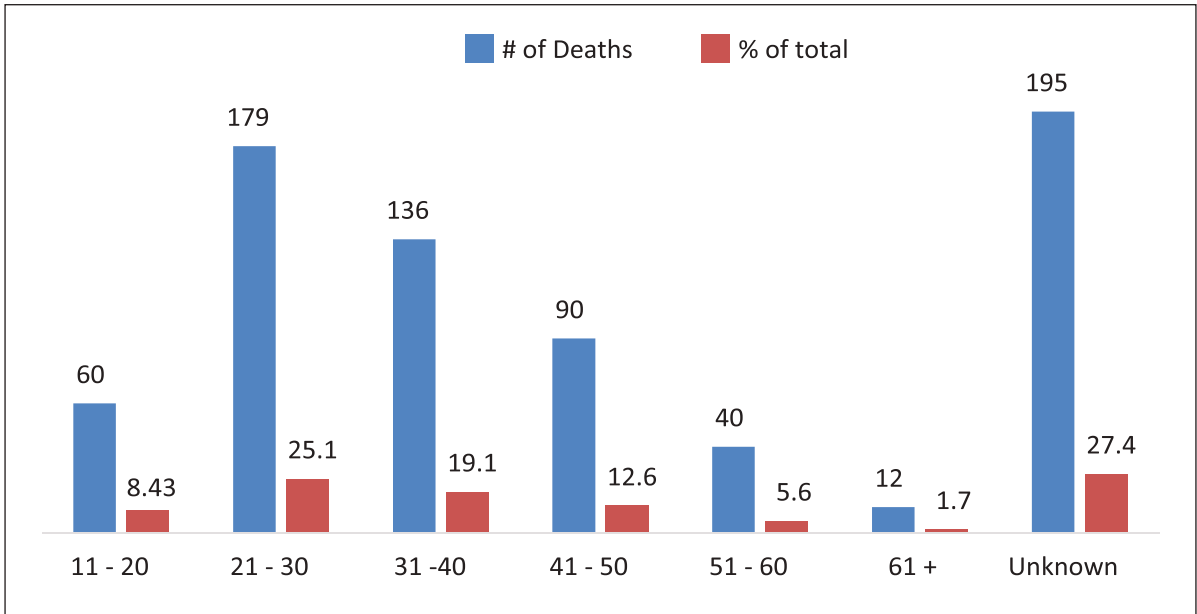

Figure 4: Age of the deceased

### 3.6 Deaths by Gender

It is noteworthy that almost all the workers were male (706), only 6 were female who died in workplace accident.

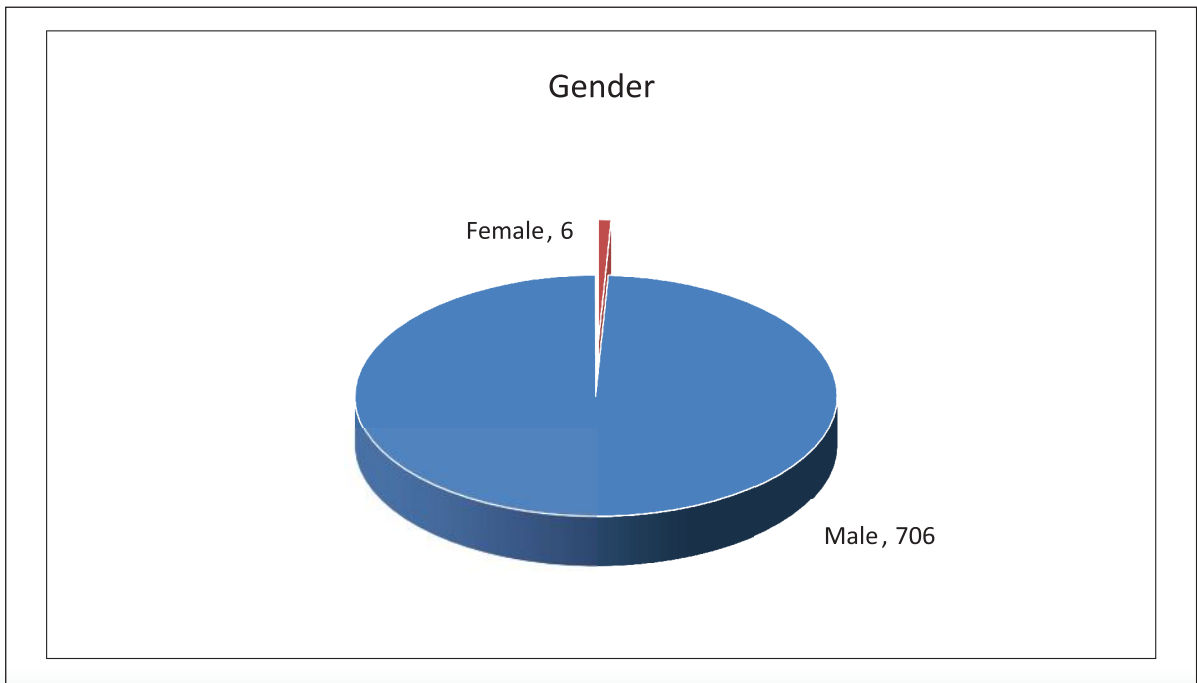

Figure 5: Gender of the deceased

### 3.7 Deaths in different Months of 2022

The highest number of deaths in the workplace occurred in June, 13 percent workers (94), then in July, 12 percent workers (85), 11 percent workers (76) in August, in October it was 10 percent (73), in September it was 9 percent (68), in February April were 8 percent (54). The lowest number of deaths in the workplace occurred in November and December which is 5 percent (38).

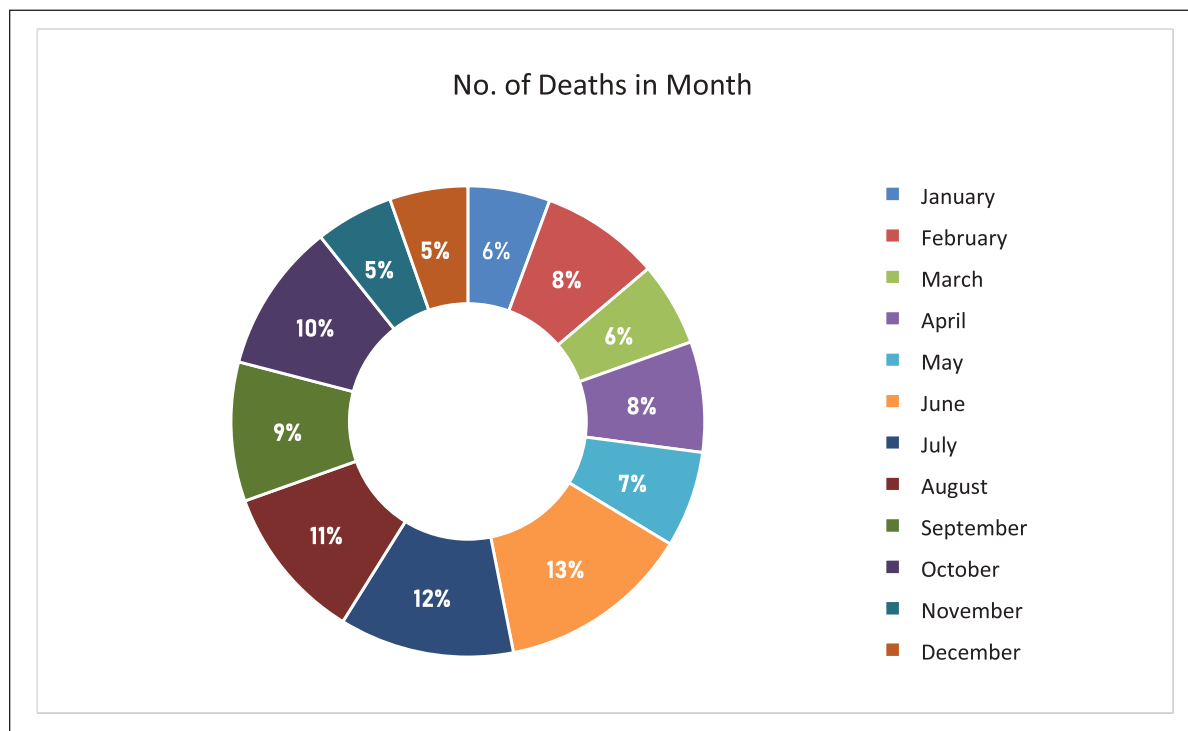

Figure 6: Deaths by Month

### Summary of Findings
